

FEATURES:

- measures temperature in fahrenheit and celsius
- requires 2-3/8" dia. mounting hole (through hole is recommended whenever possible as weather instruments operate better with access to atmosphere)
- 2-13/16" overall diameter (front diameter)
- 3/4" mounting depth
- brass bezel
- clear acrylic lens
- gold dial
- supplied with special press fit mounting ring for easy front mount installation
- see #16841 fro hygrometer, see #16867 for barometer

APPLICATION:

A reliable and functional wether instrument for those who wish to build their own weather station.
