

**FEATURES:**

- 121 page book
- soft cover
- contains 35 articles selected by the editors of Fine Woodworking magazine
- includes articles on the three different ways to bend wood
  1. Wood is freshly cut from a living tree, coaxed into curved shapes and clamped. This is the oldest, least precise, but easiest way to bend wood
  2. Wood that is already dry is steam cooked and then bent and clamped. This is a most challenging way to bend wood.
  3. Boards are sliced into thin supple strips which are then bent and glued together around a form. This is the most controlled way of bending wood.
- includes lots of photographs and drawings
- published by Taunton Press, Inc.
- copyright 1985

**APPLICATION:**

In 35 articles from Fine Woodworking magazine, experts reveal trade secrets and expert shop tips on bending wood.
