

Mounting instructions for Clean Sweep

IMPORTANT! Make sure to turn off and unplug your saw prior to Clean Sweep installation

TOP VIEW

SIDE VIEW

1. Remove blade from saw
2. Clean tire of any debris. (The Clean Sweep will help keep further debris from your tire, but will not remove existing debris)
3. Find a suitable mounting area within reach of the lower wheel. (see examples to the left)
4. Attach the Clean Sweep using the included screw, making sure not to interfere with the blade path.
5. Re-install your blade, and test your saw.
