

# INSTRUCTIONS FOR THE DELTA SHOPMASTER™ MODEL AP075 DOWNDRAFT DUST COLLECTION TABLE

This Downdraft Dust Collection Table is a cost-efficient wood-dust reduction system. This unit is compatible with standard 4" dust collectors.

**Fig. 1**

The Downdraft Dust Collection Table comes completely assembled (Fig. 1).

This unit has six (6) rubber pads (A) Fig. 2 on the bottom to hold it in place on your workshop bench or other level surface.

You can attach a 4" dust collector hose to the unit in two different ways:

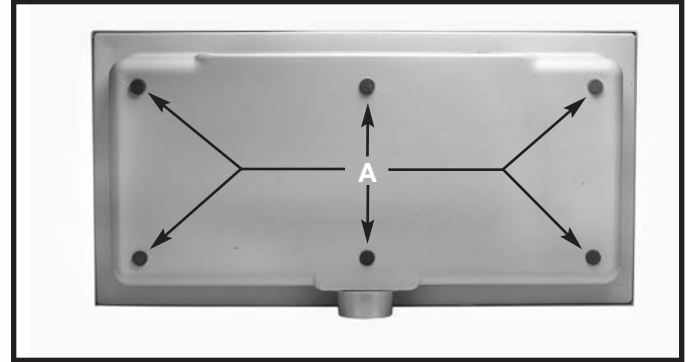

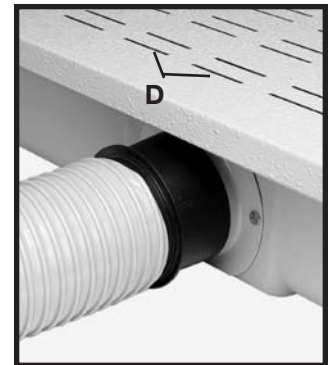

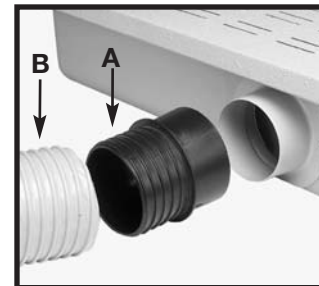

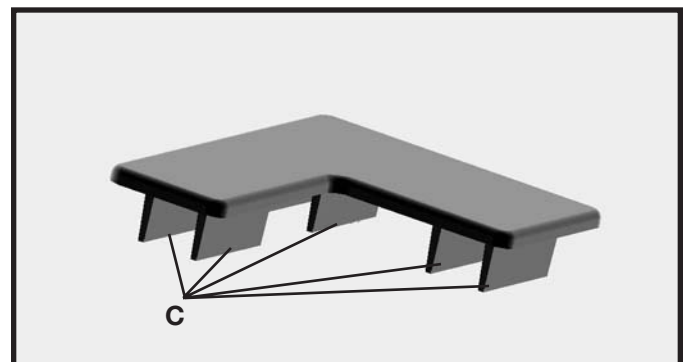

1. directly to the dust chute with a clamp (Fig. 3) or
2. by attaching a connector (A) Fig. 5 to the hose (B) and attaching the connector directly to the dust chute (Fig. 4).

NOTE: To attach the connector (A) Fig. 5 to the hose (B), place the connector in the hose and turn it counter-clockwise.

The AP075 also comes with two sanding stops, one of which is shown in Fig. 6.

The feet (C) Fig. 6, of the sanding stop can be snapped into the slots (D) Fig. 4, that are in the top of the dust collection table.

The sanding stops can be used to hold the workpiece on the dust collection table.
